

PURE *can 2.0*

ROAD MAINTENANCE CONTROLLER

The PURE Can 2.0 road maintenance controller continues from where the PURE Can left off. PURE Can 2.0 has an even better and clearer user interface, ensuring easy, accurate and ergonomic actuator management and even greater reliability.

The PURE Can 2.0 controller system has many new, user-friendly features, and the familiar features have been further developed and enhanced.

The interface has a completely new display and joystick. With improved resolution and colour reproduction, the new display has extremely clear graphics and a touchscreen to provide an even broader range of uses. The new joystick is more ergonomic, making work easier and more pleasant for the user.

PURE Can 2.0 also enables real-time tracking of actuators. There are three different groups of functions:

The first group of functions are available directly with the joystick.

The second group of functions are activated from the touchscreen.

The third group are activated both from the screen and with the joystick.

GROUP 1:

- Tipper, tipper body vibrator and tailgate
- Raising / lowering the front-mounted plough and turning
- Two additional front-mounted plough functions
- Under-mounted scraper
- Side plough

GROUP 2:

- Tipper body heating
- Spreader 1
- Spreader 2
- Extra functions
- Hook lift / crane

GROUP 3:

- Pressure release
- Floating of under-mounted scraper
- Stabilising pressure on under-mounted scraper
- Body cover
- Cassetting
- Front-mounted sweeper
- Side feeder
- Cable lift
- Trailer tipper
- Snowbank cutting
